# Gymna G2 Traction

The Gymna G2 Traction couch has been developed according to our traditional values; an original and no-nonsense design with a 1st class finish and components. G2 Traction is specifically designed for the application of lumbar and cervical traction with the help of a traction machine, such as the Gymna AutoTrac 460.

Gymna G2 Traction guarantees many years of problem-free operation and is the most reliable partner in your practice, day after day.

## Special feature

The large cushion can slide back and forth to eliminate friction between patient and cushion during lumbar traction. The result is a much better controlled traction force, higher efficiency and increased patient comfort.

Cushion closed

Cushion slid backwards

The large cushion can be easily fixed during patient transfer, or when the couch is used for general activities.

# Customise your G2 Traction

1

## Mobile

Your Gymna G2 Traction can be equipped with a set of four pivoting wheels. This enables the couch to be easily moved for use at various locations. It also makes cleaning easy. When the wheel system is in upward position, the Gymna G2 rests firmly on the special Elastolan® anti-slip feet.

2

## Optimal support

A face opening can be added to the Gymna G2. The option includes a small cover cushion.

3

## Foot control

The couch is height adjustable for easy patient access and comfortable use. The powerful electric motor can be operated by foot control.

4

## Easy access switch

The Gymna peripheral switch enables you to adjust the height at all four sides of the couch. The system is cleverly concealed and only requires minimal force to operate. It does not protrude or obstruct anywhere which makes accidental operation impossible (optimal safety).

5

## Manual control

Choose the hand-operated switch in case you prefer manual control of the height adjustment.

6

## Autonomous

The hydraulic foot pump ensures that you are not reliant on the mains power supply. The Gymna G2 can be adjusted anytime and anywhere.

## Cushions

The cushions are available in 11 colours. The durable upholstery is fire-retardant, blood- and urine-resistant and easy to clean and disinfect.

### Style:

Carbon Chrome Pacific Ivory

Sahara Marble Havana Terracotta

### Fashion :

Atoll Mandarin Agave

# Overview

## G2 Traction

## Accessories

### Detachable fixation frame for the AutoTrac 460

The height adjustable bar allows to vary the pulling direction of the traction unit's cord.

### Gymna AutoTrac 460

Digital traction unit for continuous, intermittent or harmonic intermittent lumbar and cervical traction therapy. Practical machine with all must-have functionality and rock solid build quality. Supplied with treatment guide.
