

## Gymna Physio Care

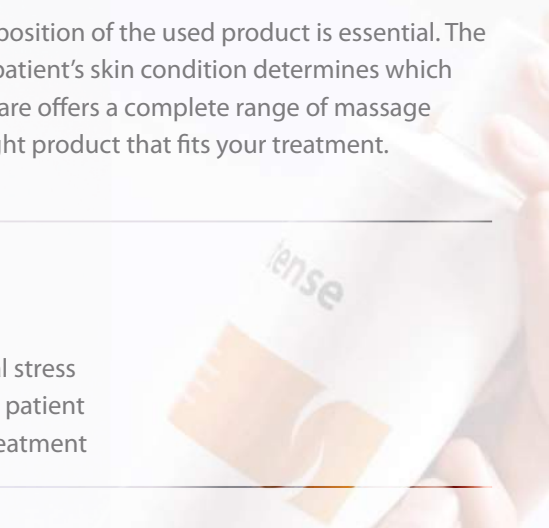

### Discover the new Gymna massage lotions

Each therapeutic massage involves applying mechanical stress to the skin. Therefore, choosing the right massage product is important. Gymna massage lotions have been especially developed to keep the skin of both the therapist and the patient in good condition and optimally balanced.

To get the desired massage effect, the composition of the used product is essential. The length and type of treatment and also the patient's skin condition determines which product is the best to use. Gymna Physio Care offers a complete range of massage lotions which enables you to choose the right product that fits your treatment.

Gymna massage lotions:

- facilitate gliding movement
- protect the skin from mechanical stress
- care for the skin of therapist and patient
- ensure dry & supple skin after treatment
